11 August 2003 **NEWS RELEASE** # 2003-11

“West Silver Cloud, Nevada – Update”

Senator Minerals Inc (“the Company”) announces an update on its West Silver Cloud property (the “Property”), Elko County, Nevada.

A NI43-101-compliant Technical Report and a Valuation Report have been completed by Alan Morris, CPG, and have been submitted to the Exchange as part of the approval process for the non-arms-length transaction through which the Company is acquiring a 100% interest in the Property, net of a 3% NSR.

These reports are available for viewing on the Company’s web site:

Technical Report: <http://www.senatorinc.com/Properties/WSC/WSC43-101tech.pdf>

Valuation Report: <http://www.senatorinc.com/Properties/WSC/WSCval.pdf>

In response to questions about the location and history of the Property, the Company advises as follows:

- In 2002, Placer Dome entered an agreement to earn a 70% interest in Teck-Cominco’s Silver Cloud property, with one of the terms being the financing and completion of US\$7,000,000 in exploration work.
- On 13 January 2003, the West Silver Cloud property was staked by RMIC Gold (R. Redfern). This 760 acre claimblock was located adjacent to and west of the original Silver Cloud property.
- The staking was done to claim ground that was interpreted to cover significant fault structures parallel to those which host high-grade gold-silver mineralization at the Silver Cloud mine.
- Limited exploration work resulted in two phases of silica veining being found along this fault corridor, along with remnants of silica sinter sheets along volcanic bedding and erosion surfaces.
- Regional gravity station data suggest that these fault structures form the western control-fault boundary of the Silver Cloud structural system, which projects north to the Midas Mine.
- On 17 January 2003 and subsequent to a second round of drilling, Placer Dome signed an agreement with RMIC Gold to review data on the West Silver Cloud. This agreement allowed Placer Dome complete flexibility of action on any neighboring property.
- In February 2003, Placer Dome staked to the north, south, and west of the West Silver Cloud property, thereby creating a large holding which completely surrounds West Silver Cloud.
- In March 2003, Placer Dome published its Exploration 2003 brochure and featured only six properties, one of which was Silver Cloud. This brochure can be found on the Placer Dome web site at <http://www.placerdome.com/investors/content/financials/downloads/exploration03.pdf>
- In April 2003, Senator entered into a non-arms-length agreement with RMIC Gold (R. Redfern is a director of Senator) to acquire a 100% interest in the West Silver Cloud property through a lease option agreement.
- In May 2003, Placer Dome completed a third round of drilling. As is customary with majors, it is not anticipated that any specific results will be announced.

The NI43-101-compliant Technical Report recommends first phase geochemical and geophysical work totaling approximately US\$130,000 on the Property.

This News Release was prepared on behalf of the Board of Directors, which accepts full responsibility for its contents.

ON BEHALF OF THE BOARD *"Tony Simon"*
TONY SIMON, BComm, CA President
