SNR # 2007-3

“Additional Staking on Ivanhoe Creek Property, NV”

Senator Minerals Inc (“Senator” or “the Company”) reports that, as operator, it has completed the staking of three placer claims over part of its Ivanhoe Creek project to cover a potential sodium bentonite deposit for the benefit of Senator / Kent.

Senator is currently carrying out a \$600,000 diamond drill program that has been funded by Kent Exploration Inc, which has earned 50% of Senator’s interest in the Ivanhoe Creek project. The exploration targets are Midas-style gold-silver veins at depths ranging from 100 to 250 meters.

The Ivanhoe Creek property is located just north of Great Basin Gold’s Hollister development in northeastern Nevada, where underground drilling has recently expanded and upgraded the mineral resources to approximately two million ounces gold equivalent.

+++++

Senator Minerals Inc is a TSX-V-listed junior exploration company with a diverse portfolio of property interests in North America.

Senator has one 50% and four 100% lease option interests in five highly prospective Midas-style targets in the Northern Nevada Rifts area, a 100% interest in two prospects in Nevada’s Cortez Hills area, and a 100% interest in the Taurus copper-moly-gold deposit in southeastern Alaska.

Senator holds 1% NSR’s on the Rosebud gold-silver prospect in northwestern Arizona and on both the Okey and Key high grade copper prospects in northeastern British Columbia.

This News Release was prepared on behalf of the SNR Board of Directors, which accepts full responsibility for its contents.
