SNR # 2007-6

“SNR Options Uranium Target in Athabasca Basin, Saskatchewan”

Senator Minerals Inc (“Senator” or “the Company”) reports that it has entered into an agreement with Geomode Mineral Exploration Ltd (“Geomode”), an arm’s-length vendor, to acquire a 100% interest, net of a 1% NSR, in a highly prospective 3,370 hectare uranium target, the Geike River Claim (the “Claim”), located in the Athabasca Basin, Saskatchewan.

The Claim, designated number S-110885, is considered to be a high priority target due to its proximity to existing large high-grade uranium mines and its potential to host similar mineralization. The Claim is located in the eastern portion of the Athabasca Basin, approximately 27km southeast of Cigar Lake and 35km east of MacArthur River Mine (Cameco/Cogema), the largest high-grade uranium mine in the world. The Claim adjoins claims held by Denison Mines Corp (DML: TSX and DNN: AMEX), formerly International Uranium Corp, and CanAm Uranium (CAUI: OTCBB).

Until recently, the Claim was controlled by International Uranium Corp, which, through Denison, continues to have a significant presence in the area. The Claim forms part of the Thompson River Project, which is contiguous to the Moore Lake and South Cigar Projects, controlled by Denison and JNR Resources.

To acquire a 100% interest, net of a 1% NSR, in the Geike River Claim, Senator is required to perform exploration and development work sufficient to keep the Claim in good standing, and to pay an aggregate of C\$300,000 and issue 1,500,000 common shares to the vendor over a two year term as follows:

- a) C\$100,000 cash and 400,000 common shares upon receipt of regulatory approval;
- b) C\$100,000 cash and 500,000 common shares on the first anniversary of the agreement; and
- c) C\$100,000 cash and 600,000 common shares on the second anniversary of the agreement.

First and second anniversary payments are subject to Senator having received a NI 43-101-compliant report recommending further work. In addition, a one percent (1%) NSR has been reserved in favor of the vendor, which can be purchased by Senator for US\$1,000,000. This transaction remains subject to regulatory approval.

Tony Simon, president of Senator, comments, “The expansion of Senator’s exploration property interests to include a uranium target surrounded by established uranium producers and explorers in the well-known Athabasca Basin is another significant step in Senator’s goal of acquiring exploration interests in politically stable, highly prospective areas.”

+++++

Senator Minerals Inc is a TSX-V-listed junior exploration company with a diverse portfolio of property interests in North America.

Senator has one 50% and four 100% lease option interests in five highly prospective Midas-style targets in the Northern Nevada Rifts area, a 100% interest in two prospects in Nevada's Cortez Hills area, and a 100% interest in the Taurus copper-moly-gold deposit in southeastern Alaska.

Senator holds 1% NSR's on the Rosebud gold-silver prospect in northwestern Arizona and on both the Okey and Key high grade copper prospects in northeastern British Columbia.

This News Release was prepared on behalf of the Senator Board of Directors, which accepts full responsibility for its contents.

ON BEHALF OF THE BOARD
